10	SET SCREW	STAINLESS STEEL	2

# IMPORTANT INFORMATION!

## MUST READ BEFORE ASSEMBLY – NEW PARTS ATTACHED TO BOX

New set screws have been provided with all Stryker LP100 leaning posts. These set screws are used for securing the back rest clamps to a desired position. Attached to the outside of the shipping box is a packet with two **pointed tip set screws** that are to be used instead of the flat tip set screws currently installed in the clamps. **Please discard the incorrect flat tip set screws.** Refer to part #10 in the schematic below which can be downloaded from [strykertops.com/installation-guides](http://strykertops.com/installation-guides).

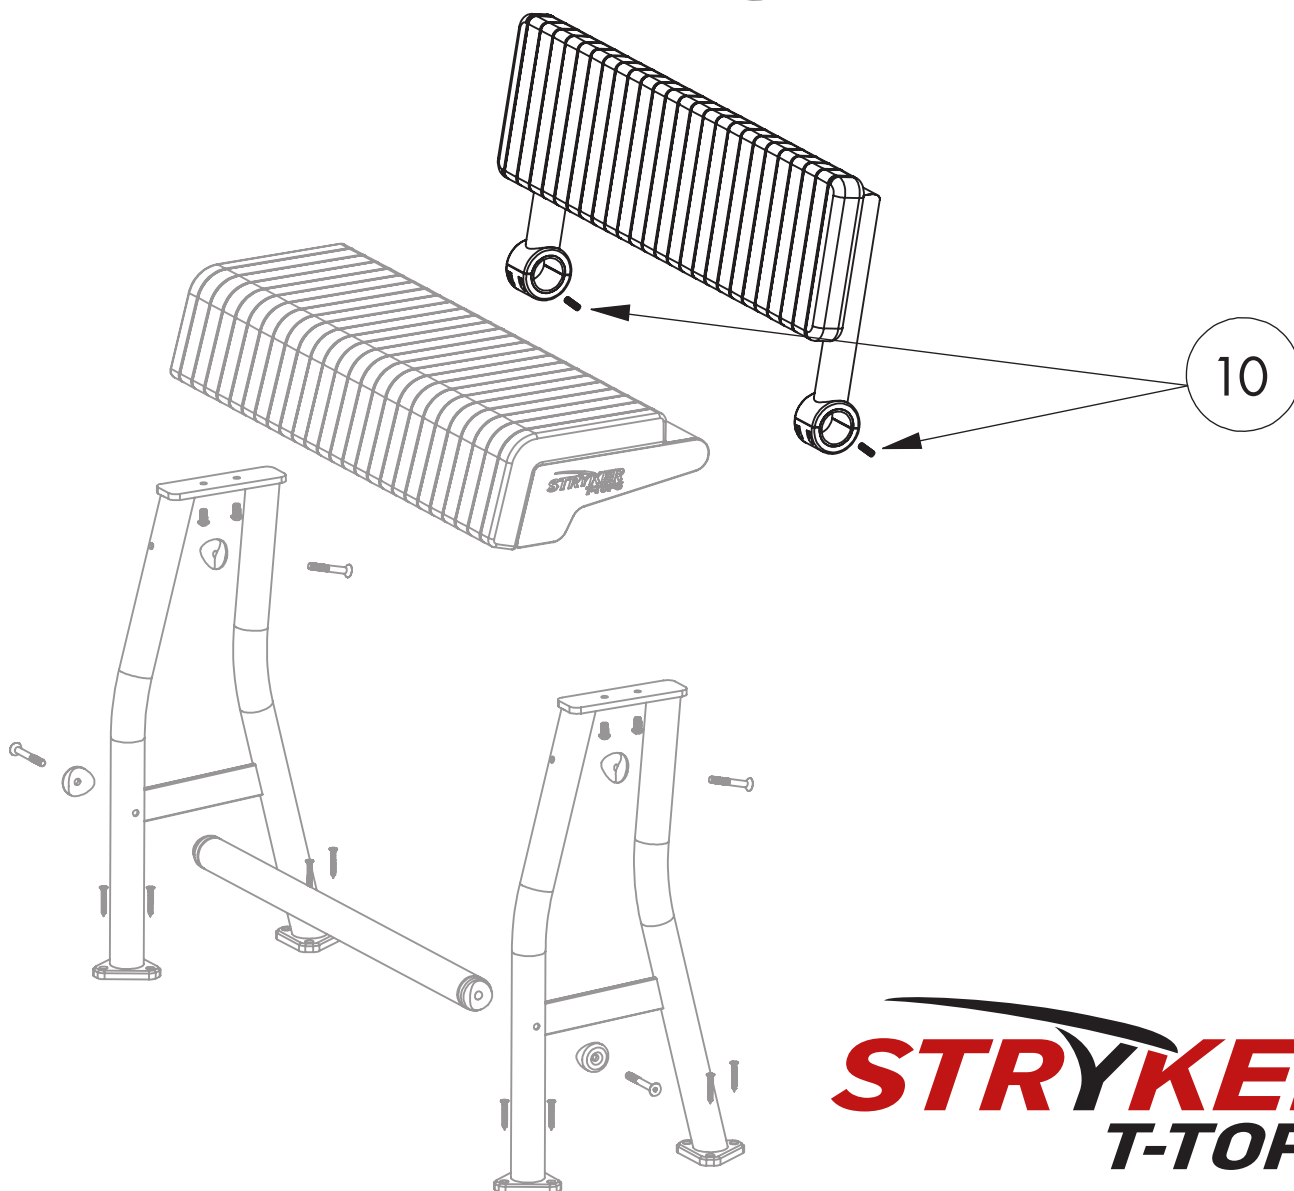

### NEW POINTED TIP SET SCREW

Use these two replacement screws during the installation.

### OLD FLAT TIP SET SCREW

**DO NOT USE!** Discard these two screws immediately.
